DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 15, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen, U.S. Patent # 6,194,962 B1.

Fig. 4 of Chen discloses an amplifier comprising: transistors MP1, MP2 can be read as first differential amplifier section wherein transistors MP1, MP2 can be read as a first differential pair of PMOS transistors; transistors MN1, MN2 can be read as second differential amplifier section wherein transistors MN1, MN2 can be read as a second differential pair of NMOS transistors; switching/current sense circuit 32 can be read as a bias circuit wherein signal Vref can be read as a control signal; transistors; circuit 34 can be read as an output circuit.

Regarding claim 15, although Chen does not have his method written out structurally, his method resides inherently in his apparatus.

Allowable Subject Matter

Claims 2-14, 16-21, and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
